

All-in-One Construction Management — Powered by Salesforce

Sell Faster. Build Smarter. Deliver On Time.

An **affordable, Salesforce-powered construction management platform** that brings **sales, projects, materials, and workforce** together in one intelligent system.

From the **first customer enquiry to final job completion**, automate every step with confidence — reduce manual effort, eliminate errors, and gain real-time visibility across your entire operation.

Built for **Sales Teams, Project Managers, Store Keepers, and Field Labour**, this solution scales with your business without the complexity or high cost of traditional construction software.

From Enquiry to Execution — Fully Automated

♦ Lead to Revenue, Without Gaps

- Automatically capture customer enquiries
- Convert leads into opportunities and quotes in just a few clicks
- Track deal progress with clearly defined sales stages
- Ensure accurate revenue forecasting

No spreadsheets. No guesswork. Just clarity.

Smart Quoting & Contract Management

♦ Accurate Quotes, Faster Closures

- Create detailed quotes directly from opportunities
- Automatic calculation of pricing, labour, and materials
- Generate professional quote PDFs instantly
- Send quotes to customers for **Accept / Review / Reject** — fully tracked

♦ **Contract & Payment Automation**

- Convert accepted quotes into contracts
- Auto-generate contract PDFs
- Collect digital signatures
- Trigger invoices and online payments (Stripe integration)
- Automatically create jobs only after payment confirmation

No manual follow-ups. No missed steps.

Complete Job & Workforce Management

♦ **Structured Job Execution**

- Jobs are created automatically after payment
- Break jobs into clear phases using Work Breakdown Structure (WBS)
- Assign labour to jobs with full control

♦ **Timesheets Made Simple**

- Labour logs work hours easily
 - Automatic approval rules
 - Prevents incorrect or duplicate entries
 - Real-time visibility into labour productivity
-

Material & Inventory Control You Can Trust

♦ **Controlled Material Movement**

- Create material issue and return documents
- Track material usage per job

- Approval-based workflow ensures accountability
- Inventory updates automatically after approval

Once approved, records are locked — ensuring data integrity.

Real-Time Reports & Dashboards

♦ Know What's Happening — Instantly

- Job progress dashboards
- Revenue and payment tracking
- Labour utilization reports
- Timesheet summaries

Filter by job, labour, or date range — all data is always up to date.

Built for Every Role

Sales Managers

- Manage leads, opportunities, quotes, and contracts

Project Managers

- Control jobs, labour assignments, materials, and approvals

Store Keepers

- Handle material documents with approval workflows

Labour Users

- View assigned jobs only — simple and secure

Admins

- Full control over users, access, and system setup
-
